

Professional Summary

Pipeline and tools developer building the infrastructure behind CG production: Python/PyQt desktop tooling, render-farm automation, and cross-DCC workflows for an architectural visualization studio. Background in character rigging (BFA from the Cleveland Institute of Art; shipped SMITE 2 as an Associate Technical Animator), so tools are built around how artists actually think and work.

Core Skills

Programming	Python (PyQt, pymxs, Maya API), MaxScript, MEL, Bash, Git, Perforce
DCC/Engines	3ds Max, Maya, Unreal Engine 5, Unity, Substance Painter
Focus	Pipeline development, render-farm automation, character rigging, batch tooling

Professional Experience

- 2026–Present **CGI Pipeline Developer**, *MediaLab 3D Solutions*, Remote
- Designed and built a Python scene-automation framework for scene preparation, diagnostics, and render-farm submission, accessible via CLI, PyQt desktop app, and native 3ds Max integration
 - Developed a MaxScript batch-rendering suite that classifies objects across XRef-linked scenes and automatically renders material/finish combinations, replacing a manual per-option workflow with one-click submission
 - Built artist-facing tools for the studio's central 3ds Max toolset (lighting, visualization, camera, and export utilities), plus the packaging and deployment workflow that ships them to production
- 2026 **MaxScript Specialist (Contract)**, *MediaLab 3D Solutions*, Remote
- Built MaxScript and Python automation for asset processing and repetitive scene operations in 3ds Max; converted to full-time pipeline developer role
 - Partnered with the team to identify automation opportunities and deliver maintainable tools
- 2025 **Technical Artist (Contract)**, *Anuttacon via GoDemic*, Remote
- Developed automated asset-processing tools in Python and MEL, iterating on feedback to improve usability and reliability
 - Wrote user documentation and incorporated stakeholder feedback to meet production needs
- 2024–2025 **Technical Animator (Contract)**, *Hi-Rez Studios*, Remote
- Built Python and MaxScript automation for asset integration and deployment in an Unreal Engine 5 environment, eliminating manual setup and reducing deployment errors
 - Collaborated with Animation, Design, and QA to find bottlenecks and automate milestone-delivery steps
- 2023–Present **Rigging Artist (Freelance)**, *Independent*, Remote
- Character rigging for original characters and independent projects in Maya, including custom rigs for *Grimmlins Tale*
- 2023–2024 **Associate Technical Animator**, *Hi-Rez Studios*, Alpharetta, GA
- Shipped **SMITE 2** as part of the technical animation team: character rigging alongside the Python/MaxScript tooling that supported the asset pipeline
 - Built and refined character rigs for SMITE 2, partnering with animation to deliver production-ready assets
 - Developed automated batch-processing tools in Python and MaxScript, cutting manual asset-processing time by **25%**
 - Built automated asset-migration pipelines across engine versions, keeping assets compatible and reducing integration errors
- 2022–2023 **Technical Animator Intern**, *Hi-Rez Studios*, Remote
- Developed Python scripts to automate repetitive production tasks, improving efficiency and reducing manual errors
 - Identified workflow inefficiencies and built optimization tools for common bottlenecks

Education

- 2023 **BFA, Animation and Game Design**, *Cleveland Institute of Art*, Cleveland, OH
- Senior Project: Cinematic story driven game
