

Professional Summary

Technical artist and pipeline developer who shipped **SMITE 2** at Hi-Rez Studios: character rigging plus the Python/MaxScript tooling behind the asset pipeline, with contract technical-art work in Unreal Engine 5. Now building production infrastructure for an architectural visualization studio (PyQt desktop tooling, render-farm automation, cross-DCC workflows), so tools stay grounded in how artists actually think and work. Uses AI-assisted development to build and iterate production tools faster.

Core Skills

Programming	Python (Maya API, PyMEL, PyQt/PySide, pymxs), MaxScript, MEL, Bash, Git, Perforce
DCC/Engines	3ds Max, Maya, Unreal Engine 5, Unity, Substance Painter
Focus	Character rigging, pipeline development, asset and scene optimization, render-farm automation, AI-assisted tool development

Professional Experience

2026–Present	CGI Pipeline Developer , <i>MediaLab 3D Solutions</i> , Remote - Designed and built a Python scene-automation framework for scene cleanup, optimization, diagnostics, and render-farm submission, accessible via CLI, PyQt desktop app, and native 3ds Max integration - Developed a MaxScript batch-rendering suite that classifies objects across XRef-linked scenes and automatically renders material/finish combinations, replacing a manual per-option workflow with one-click submission - Built artist-facing tools for the studio's central 3ds Max toolset (lighting, visualization, camera, and export utilities), plus the packaging and deployment workflow that ships them to production
2026	MaxScript Specialist (Contract) , <i>MediaLab 3D Solutions</i> , Remote - Built MaxScript and Python automation for asset processing and repetitive scene operations in 3ds Max; converted to full-time pipeline developer role - Partnered with the team to identify automation opportunities and deliver maintainable tools
2025	Technical Artist (Contract) , <i>Anuttacon via GoDemic</i> , Remote - Developed automated asset-processing tools in Python and MEL, iterating on feedback to improve usability and reliability - Wrote user documentation and incorporated stakeholder feedback to meet production needs
2024–2025	Technical Animator (Contract) , <i>Hi-Rez Studios</i> , Remote - Built Python and MaxScript automation for asset integration and deployment in an Unreal Engine 5 environment, eliminating manual setup and reducing deployment errors - Collaborated with Animation, Design, and QA to find bottlenecks and automate milestone-delivery steps
2023–Present	Rigging Artist (Freelance) , <i>Independent</i> , Remote Character rigging for original characters and independent projects in Maya, including custom rigs for <i>Grimmlins Tale</i>
2023–2024	Associate Technical Animator , <i>Hi-Rez Studios</i> , Alpharetta, GA - Shipped SMITE 2 as part of the technical animation team: character rigging alongside the Python/MaxScript tooling that supported the asset pipeline - Built and refined character rigs for SMITE 2, partnering with animation to deliver production-ready assets - Optimized character assets for runtime performance in a live multiplayer title, keeping rigs and skinned meshes within performance budgets - Developed automated batch-processing tools in Python and MaxScript, cutting manual asset-processing time by 25% - Built automated asset-migration pipelines across engine versions, keeping assets compatible and reducing integration errors
2022–2023	Technical Animator Intern , <i>Hi-Rez Studios</i> , Remote - Developed Python scripts to automate repetitive production tasks, improving efficiency and reducing manual errors - Identified workflow inefficiencies and built optimization tools for common bottlenecks

Education

2023	BFA, Animation and Game Design , <i>Cleveland Institute of Art</i> , Cleveland, OH Senior Project: Cinematic story driven game
